

KING FISHER VILLAGE
HIDEAWAY BY THE SEA

Covid-19 Information

Dear guests,

the presentation of a COVID-19 certificate or a negative test result is no longer required for access to places such as restaurants, bars or nightclubs. There is also no mask requirement. It may happen that in some shops or banks the disinfection of the hands is required.

Antigen test

In the public hospital in Tarrafal you can go for testing from Monday to Friday from 08.30am to 12.00am without prior notice. You will receive the test written result in about 20 minutes. The hospital can be reached by taxi within five minutes. Take your passport and flight number with you. In some cases, both are required. An antigen test costs 1000 CVE.

PCR test

In Praia there is a private clinic that performs PCR tests. Our reception will be happy to help you make an appointment. The result of the PCR test will be sent to you within 36 hours to the e-mail address you provided. This PCR test costs 6500 CVE.

Travel insurance

We recommend that you take out travel insurance in case of a positive test. In case of a positive test result, you must immediately go into quarantine for seven days and are not allowed to leave the room. We will bring the food to your room. This and the postponement of your flight may result in high costs. By law we are not allowed to rent your room 48 hours after your departure in such a case.

Entry requirements

Each country has different rules for entry. Find out online which rules apply to your country. A negative antigen test is currently sufficient for entry to Cape Verde. Vaccination is not mandatory. Also note the regulations of the airlines. For domestic flights or travel to other islands within Cape Verde, a negative antigen test is sometimes required. Please check with your travel agent or online.
